

Importing Citations from **Reaxys** into RefWorks

In Reaxys:

- Conduct your search.
- Select the **Citations** tab and select the references to export.
- Click on the **Output** icon.
- Select the **Literature Management Systems** option and your choice of options for **Output range** and **Output contains**. Click OK.
- In the **Output Citation Results** window, click on **Download**.
- The contents of a .txt file will display. Save or copy the file:
File | Save as (or Save Page as)
OR
Edit | Select All | Copy

In RefWorks:

- If your RefWorks account is not open, log in.
- Select **References** from the toolbar, and then **Import**.
- Select RIS Format as both the **Import Filter/Data Source** and the **Database**.
- Browse to the text file you saved on your computer, OR paste the text into the **Import Data from the following Text** box.
- Click **Import**.
- The citations will appear in the **Last Imported** Folder.
